

ANKIT RAJ

Computer Science & Engineering (IoT) Student · Software & Web Developer

Biharsharif, Nalanda, Bihar[cite: 1] • +91 7368985353[cite: 1] • ankitraj803156@gmail.com[cite: 1]

Portfolio: [portfoli-ankit.netlify.app](#) • GitHub: [github.com/ankitraj803156-pixel](#) • LinkedIn: [linkedin.com/in/ankit-raj-467547367](#)

CAREER OBJECTIVE

Motivated second-year Computer Science Engineering (IoT) student with solid foundations in algorithmic problem solving, modern web technologies, and software development[cite: 1]. Experienced in building responsive web tools, civic applications, and tracking systems using Java, JavaScript, Python, and modern web stacks[cite: 1]. Seeking an engineering internship to apply clean coding practices to impactful real-world systems[cite: 1].

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, C++, SQL[cite: 1]
Web Development: HTML5, CSS3, DOM Manipulation, Responsive Design[cite: 1]
Tools & Platforms: Git, GitHub, GitHub Pages, Netlify, VS Code[cite: 1]
Core Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)[cite: 1]
Leadership & Soft Skills: Class Representative (CR), Technical Communication, Problem Solving, Work Ethic[cite: 1]

FEATURED PROJECTS

Attendance Matrix Tracker (AMS) Live on GitHub Pages

Tech Stack: JavaScript, HTML5, CSS3, GitHub Pages

- Designed and deployed an interactive tracking application to log, calculate, and monitor student attendance criteria dynamically.
- Implemented client-side input evaluation and data metrics calculation using vanilla JavaScript.
- Configured deployments directly via GitHub Pages for public accessibility with continuous Git version tracking.

Civic Crowd Management System[cite: 1] Core Application

Tech Stack: Python, SQL, HTML/CSS[cite: 1]

- Engineered a system to collect, catalog, and resolve crowd-related civic grievances within local communities[cite: 1].
- Structured relational database schemas with SQL and scripted procedural business logic in Python[cite: 1].
- Produced system architectural diagrams and detailed documentation for workflow tracking[cite: 1].

Government Innovation Startup Initiative Civic Tech

Tech Stack: Python, Web Technologies, Strategy

- Collaborated on an early-stage initiative focused on public sector process digitization and grievance tracking.
- Researched automated digital intake channels to optimize administrative turnaround times.

EDUCATION

Bakhtiyarpur College of Engineering (BCE Bakhtiyarpur)[cite: 1] 2025 – 2029 (Expected)[cite: 1]

B.Tech in Computer Science & Engineering (IoT Specialization)[cite: 1]

Class Representative (CR)[cite: 1]

S.K.R. College[cite: 1] Completed

Senior Secondary (Class XII, BSEB)[cite: 1]

80.0%[cite: 1]

D.L.P. School[cite: 1] Completed

Secondary School Examination (Class X)[cite: 1]

93.6%[cite: 1]

CERTIFICATIONS & LEADERSHIP

- Class Representative (CR):** Elected to coordinate batch operations, departmental notices, and student-faculty communication[cite: 1].
- Volunteer – Kaushal Manthan:** Coordinated operations and peer facilitation during student development initiatives.
- Winner – Videography Award:** Recognized for visual storytelling, technical lighting, and production editing[cite: 1].
- Technical Workshops:** Completed GenAI Exchange Hackathon (Hack2Skill) & Introduction to Computer Training (Spoken Tutorial, IIT Bombay)[cite: 1].
