

## 18. vertex

**problem statement code : 26136**

**category**- software

**problem statement title** - startup friendly public government mechanism that enables government to identify pilot, procedure and scale innovation solutions from eligible startups.

**solution proposed:**

it is a milestone-based digital procurement platform connecting government departments with startups — bypassing turnover/experience barriers per GFR Rule 173(i). AI shortlists candidates, experts select finalists for paid mini-pilots, secure milestone payments follow via PFMS, and independent validation with live tracking enables proven solutions to scale directly into full government procurement.
